

Care Symbols App

Information sheet for consumers

What must I, as a consumer, do?

Case 1:

You see the installation QR code in a catalogue or other marketing material.

Depending on your type of smartphone, you install the app as follows:

Installing the app on Android devices

Scan the QR code with your smartphone and install the full version of the app with the advertising banner.

Installing the app on iOS devices

Install the app by scanning the installation QR code. However, at first only a restricted version of the app is installed. To activate the full version, you must enter the campaign code which appears on the advertising material alongside the QR code.

Case 2:

Downloading the app from Google Play or from the App Store

If you download the app from Google Play, you will receive a restricted demo version without the scan function. The advertising banner is the GINETEX logo.

The same thing happens when you download the iPhone app from the App Store. Using the five-character campaign code (for example G1664), which also appears on the marketing material, you can enable the scan function and display the app with the company's advertising banner.

The URL for the Android demo version on Google Play is:

https://play.google.com/store/apps/details?id=com.moma_wv.android.care

What does the app cost?

You can download the app free of charge. The full functionality is financed by means of the advertising banner.

How can I find the app on Google Play or in the App Store?

You can find the app by entering the following search terms: *MoMa WV* and *care symbols*.
